

About MPRES

The Montana Partnership with Regions for Excellence in STEM (MPRES) project is designed to help teachers implement the [K-12 Framework for Science Education](#) and the [Next Generation Science Standards](#) (NGSS). Teachers who engage in the project will be on the cutting-edge of science education and will be able to be teacher leaders in their districts following the program.

MPRES seeks to accomplish its goals via two methods:

- [Professional Development Opportunities with MPRES Trainers](#)
- [The MPRES Online Toolkit](#)

Please browse the website to learn more, or [Contact MPRES](#) with any questions, comments or requests.
